

# Ansif P. Ibrahimkutty

Senior Software Developer · Co-Founder, Sevendyne

Kochi, India · open to remote

ansif.pi@gmail.com · +91 95444 67729 · [linkedin.com/in/ansifpi](https://www.linkedin.com/in/ansifpi) · [github.com/ansifi](https://github.com/ansifi) · [ansifi.github.io](https://ansifi.github.io)

## Summary

Hands-on software developer with 18+ years across C++/Qt embedded, full-stack web, and AI-integrated backends. I build production software end to end — from real-time embedded systems and automotive HMI early on, to today's AI-driven web platforms: OpenAI automation, data pipelines, and multi-tenant SaaS. I co-founded Sevendyne, a delivery company that ships client products and stands up dedicated India-based engineering teams — owning the build, the delivery cadence, and the India payroll and statutory compliance behind each team. I work as both the technical lead on delivery and the person who builds the teams that execute.

## Skills

**Languages & frameworks:** C++ · Qt · QML · Python · Django · Node.js · Express · React · Angular · Vue.js · Spring Boot · Laravel · PHP · Ruby on Rails · Android

**AI & data:** OpenAI APIs · Python data pipelines · PostgreSQL · MySQL · SQL Server · SQLite

**Platform & infra:** REST APIs · Docker · GCP Cloud Run · nginx · embedded Linux · IVI/HMI

**Leadership:** technical lead · code review · dedicated-team building · India payroll & compliance operations

## Experience

### Sevendyne — Co-Founder & Principal Developer

Sep 2016 – present

*Kochi, India · remote delivery for UK, Germany, Malaysia, Singapore, UAE · [sevendyne.com](https://sevendyne.com)*

I co-founded Sevendyne and lead technical delivery. We build client software and run dedicated engineering pods for companies that want to stay front-facing while we own the build — including the India payroll, statutory compliance (PF/ESIC/TDS/GST), and delivery cadence behind each team. The engagements below were personally led and delivered by me.

**Sevendyne platform** (Dec 2025 – present) — designed and built the company's multi-app platform

- **Payrolls HRMS** — Django + Next.js: payroll runs, payslips, client invoicing, PF/ESIC/TDS/GST workflows, per-client databases
- **Jobs portal** — employer/candidate workspaces, résumé intake, interview-coordination APIs
- **Academy** — candidate progress + topic-test scoring APIs with embedded dashboard auth
- **CRM / outreach** — Node APIs, SQLite tenant CRM, lead-finder modules wired to the jobs pipeline
- **Infra** — Docker Compose, GCP Cloud Run, nginx path routing across services

### CSR Informatics GmbH, Germany — Full-Stack / AI Developer

May 2022 – Mar 2025

*Remote · via Sevendyne · long-running engagement across analytics, e-commerce data, and recruitment automation*

- **Zoho Recruit automation (2024–2025)** — Python + OpenAI candidate search and import; idempotent SQL loaders; operator review screens and workflow gates so recruiters approved before records went live. Python · OpenAI · Zoho REST · SQL Server
- **E-commerce AI pipeline (2023–2024)** — Rails / Spree app; Python scrapers with OpenAI attribute extraction; ETL into SQL Server for catalogue and ops dashboards. Rails · Spree · Python · OpenAI
- **Restaurant analytics (2022–2023)** — Angular front end, Spring Boot services, heavy SQL aggregation, Apache eCharts for multi-site KPIs. Angular · Spring Boot · SQL

### Quantyf — Backend Developer (contract)

Jun 2025 – Nov 2025

*Remote · [quantyf.com](https://quantyf.com) — AI-powered supply-chain optimization*

Python backend for a supply-chain “what-if” optimisation product: REST API design for scenario input/run-status/results, integrating solver runs with the product UI, and structured code review on core algorithm modules. Python · REST · optimisation services

### Niaga Prestasi, Malaysia — Full-Stack Developer

Sep 2019 – May 2022

*Remote · via Sevendyne · logistics and payments platforms in daily APAC production*

- **TLMS logistics (2019–2022)** — Malaysia–Singapore freight platform; re-architected the Laravel transaction layer with queue workers to clear sync deadlocks; Vue.js operator UI; thousands of live shipments daily. Laravel · Vue.js · MySQL · Redis
- **Payment CRMs (2019–2022)** — Multi-tenant CodeIgniter CRM for wallet, merchant and logistics channels; payment adapter layer; Android + web QR checkout flows. PHP · CodeIgniter · Android
- **Ethereum property wallet (2020–2021)** — React wallet UI; Solidity contracts; Truffle deploy pipeline; Web3.js multi-network transactions. React · Solidity · Truffle · Web3.js

### Earlier Sevendyne delivery

2016 – 2019

- **German navigation pod** — embedded C++ on Linux for real-time navigation features; worked directly with German product leads.
- **UK automotive / industrial programmes** — software and automation delivery on long OEM programmes (PLC/SCADA bench coordination with UK technical leadership).
- **Trading-system Qt desktop** — low-latency C++/Qt/Wt trading desks; adapter layer over proprietary market-data libraries; multi-window operator layouts.

## Earlier Career (2006 – 2016)

---

### Freelance Software Developer

Jan 2012 – Aug 2016

*India · remote*

- **Wise Owl (2015–16)** — C++/Wt property-admin platform: tenants, brokers, listings
- **Montal (Jan 2013 – Feb 2015)** — Qt/QML 2D game UI — screens, object scaling, and gameplay mechanics
- **Quality Education Holdings (Jan 2012 - Jan 2013)** — .NET/C# fingerprint attendance apps

### HexoSys Sdn Bhd — Software Engineer

Sep 2009 – Sep 2011

*Kuala Lumpur, Malaysia*

USB protocol tester: Qt/VC++ debug console; TCP/UDP validation on embedded hardware.

### Integral / UCI Technologies — Software Engineer

2006 – 2009

*Kochi, India*

VC++ USB modelling application (Pathmodeler), trading utilities, and CAD tooling — foundational embedded and systems work.

## Education

---

**B.E. Computer Science** — TKM College of Engineering, Kerala University · 2002–2006

## Open To

---

Senior software development (backend / full-stack) on a contract or fractional basis — and standing up dedicated engineering teams via Sevendyne for founders who want to own product direction while we run the build. Reachable by email or LinkedIn.
